Protective Sleeve / Box	Dimensions / Details: Individual transit packaging · Quantity Included: 1	\$44

PRODUCT DESCRIPTION

The Kreidler Soft Tissue Retractor is a specialized maxillofacial surgical retractor engineered specifically to provide safe, non-traumatic displacement of mucoperiosteal flaps and soft tissues during orthognathic and mandibular surgery. Designed with an anatomical blade contour, this retractor allows oral surgeons to shield facial musculature and vascular margins cleanly away from oscillating saws and rotary burrs.

Built to optimize tactile reach and maneuverability, this Kreidler Soft Tissue Retractor configuration features an overall tool length of 21 cm (\$44). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), its working end incorporates a 5 mm × 20 mm wide blade layout specifically contoured to cradle delicate oral mucosal tissues without causing localized pressure necrosis. The slender shank keeps the assistant's hands safely outside the intraoral field of view, while the ergonomic handle delivers fatigue-free manual leverage.

Forged with an anti-glare satin matte finish, Retractor Maker produces the Kreidler Soft Tissue Retractor to withstand repetitive hospital sterilization cycles, providing oral, maxillofacial, and plastic surgeons worldwide with high corrosion resistance, structural rigidity, and complete autoclave durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
