SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Awty Condylar Neck Retractor	22 cm overall length, curved condylar blade	\$59
Protective Sleeve / Box	Individual transit packaging	\$59

PRODUCT DESCRIPTION

The Awty Condylar Neck Retractor is an essential maxillofacial surgical retractor engineered specifically to provide safe, stable exposure of the condylar neck and subcondylar region of the mandible. Designed with an anatomically curved working end that hooks securely behind the posterior border of the ascending ramus, this instrument protects facial nerve branches and internal maxillary vessels from oscillating saws and rotary burs.

Engineered for deep-space oral and maxillofacial access, this Awty Condylar Neck Retractor configuration features an overall length of 22 cm, keeping the assistant's hands outside the surgeon's operative field. Its advanced ergonomic handle integrates comfort-enhancing contours that optimize tactile grip, offering superior control and significantly reducing manual fatigue during lengthy orthognathic osteotomies.

Machined from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Awty Condylar Neck Retractor to withstand repetitive hospital sterilization cycles, providing oral, maxillofacial, and plastic surgery suites with an indispensable instrument for trauma reconstruction and ramus surgery.

THANK YOU

We look forward to discussing your surgical retractor requirements.
