cGMP Approved

SCCI Registered since 2023

SIMAP Approved since 2023

All procedures and processes follow FDA guidelines.

B-Z Retractor

SKU RM-BZR-1

\$339 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
7.5 cm Deep (45° or 90°)	RM-BZR-1-1	\$339
10 cm Deep (45° or 90°)	RM-BZR-1-2	\$359

PRODUCT DESCRIPTION

The B-Z Retractor is a robust self-retaining surgical retractor engineered to establish deep, uncompromising operative visibility during complex spinal, orthopedic, and pelvic surgical procedures. By providing mechanical counter-traction on dense muscle and fascial planes, this instrument frees surgical staff while maintaining a stationary operative corridor in deep cavities.

Designed for adaptable anatomical clearance, this modular B-Z Retractor frame delivers a smooth expansion capability up to 12.8 cm in width. Surgeons can configure the system with either 45-degree or 90-degree angled chassis geometries to keep the mechanical arms outside the direct surgical view, paired with either 7.5 cm (\$339) or 10 cm (\$359) deep retraction blades. The fine-pitch ratchet mechanism locks securely under high muscular tension to prevent accidental disengagement.

Manufactured from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin finish, Retractor Maker produces the B-Z Retractor to withstand high mechanical loads and repetitive hospital steam autoclaving cycles, giving spinal and trauma surgeons long-lasting reliability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
