Scoville Nerve Retractor

SKU RM-SNR-165-1

\$29 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Scoville Nerve Retractor	16.5 cm overall length, contoured angled tip, slender shaft	\$29
Protective Sleeve / Box	Individual transit packaging	\$29

PRODUCT DESCRIPTION

The Scoville Nerve Retractor is an essential neurosurgical and spinal instrument engineered specifically to provide delicate, non-traumatic nerve mobilization and soft-tissue displacement in confined operative corridors. Designed with a compact profile, this retractor allows surgeons to manipulate nerve trunks and dural margins cleanly without encroaching upon the microscopic visual corridor or crowding delicate micro-instruments.

Optimized for tighter, more superficial access compared to longer variants, this Scoville Nerve Retractor configuration features an overall tool length of 16.5 cm (\$29). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with high tensile strength, the blade structural geometry incorporates an elongated slender body shaft terminated with a contoured, angled working tip profile designed to prevent accidental puncture trauma to sensitive tissues. Its ergonomic flat handle provides operating surgeons with refined tactile sensitivity and fingertip control.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Scoville Nerve Retractor as a non-sterile, fully autoclavable device built to withstand frequent high-temperature reprocessing cycles while providing a lifetime warranty against rust, delivering complete clinical dependability for spine and peripheral nerve suites worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
