Wallace Knee Retractor

SKU RM-WKR-5IN-1

\$79 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Wallace Knee Retractor	5" (12.7 cm) overall length, dual-armed self-retaining frame, screw lock gear	\$79
Protective Sleeve / Box	Individual transit packaging	\$79

PRODUCT DESCRIPTION

The Wallace Knee Retractor is a specialized self-retaining orthopedic surgical retractor engineered specifically to provide reliable, hands-free soft-tissue and capsular displacement during knee arthrotomy and joint reconstructive procedures. Designed with an adjustable dual-armed spreader mechanism, this instrument holds incision margins and periarticular tissues apart under calibrated mechanical tension, eliminating assistant hand fatigue while preserving an open visual field into the joint space.

Built to withstand high-frequency autoclave sterilization runs without degrading, this Wallace Knee Retractor configuration features an overall tool length of 5 inches (12.7 cm, \$79). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) to ensure exceptional corrosion resistance, the structural geometry incorporates a dual-armed self-retaining layout governed by a central screw lock gear that provides smooth, micro-adjustable arm spreading that locks firmly under counter-traction without accidental slipping. Its curved, blunt working tips cradle capsular margins safely without causing localized crush injury.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Wallace Knee Retractor to withstand repetitive hospital autoclave cycles, providing knee arthroplasty suites, sports medicine clinics, and orthopedic trauma operating rooms worldwide with exceptional mechanical stability, corrosion resistance, and complete clinical dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
