15.0 cm Long Variant — 15.0 cm (approx. 6.0")	RM-HDR-1-2	\$399

PRODUCT DESCRIPTION

The Hoyos Distal Retractor is a specialized aesthetic surgical retractor engineered specifically to provide expansive distal soft-tissue elevation and precise visual clearance during high-definition abdominoplasty and body contouring procedures. Designed in collaboration with modern lipo-abdominoplasty techniques, this instrument allows surgeons to maintain clean operative pockets while sculpting superficial anatomical muscular details without crushing vascularized cutaneous flaps.

Built to match variable pocket dimensions, this Hoyos Distal Retractor is offered in two distinct longitudinal layouts selectable through the purchase configuration menu: a 7.5 cm Short size variant (\$349) for localized distal flap elevation and an extended 15 cm Long size variant (\$399) for deep surgical pocket access. The curved, polished distal blade distributes counter-traction evenly to protect dermal microcirculation, while the heavy-duty handle provides operating assistants with steady manual leverage during prolonged contouring.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Hoyos Distal Retractor to withstand repetitive hospital autoclave cycles, providing plastic and aesthetic surgery clinics worldwide with unmatched clinical stability, structural rigidity, and corrosion resistance.

THANK YOU

We look forward to discussing your surgical retractor requirements.
