Protective Sleeve / Box	Dimensions / Details: Individual transit packaging · Quantity Included: 1	\$49

PRODUCT DESCRIPTION

The Lahey Thyroid Retractor is a classic endocrine and general surgical retractor engineered specifically to provide safe, non-traumatic soft-tissue displacement and strap muscle retraction during thyroid and parathyroid surgery. Designed with an elongated right-angled blade, this instrument allows surgical teams to displace the sternocleidomastoid and strap muscles laterally away from the thyroid gland, establishing a clear visual corridor while safeguarding the recurrent laryngeal nerve.

Built to ensure balanced mechanical leverage during delicate neck dissections, this dedicated Lahey Thyroid Retractor configuration features an overall tool length of 20.3 cm (8 inches, \$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), its working end incorporates a right-angled blade profile featuring a built-in terminal retaining lip across a 25 mm blade length. The retaining lip prevents retracted tissues from creeping over the blade edge, while the ergonomic flat handle provides operating assistants with fatigue-free manual leverage throughout multi-hour procedures.

Forged with an anti-glare satin matte finish, Retractor Maker produces the Lahey Thyroid Retractor to withstand repetitive hospital sterilization cycles, providing endocrine, ENT, and general surgery operating theaters worldwide with exceptional corrosion resistance, structural rigidity, and complete autoclave durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
