Gonzalez Gluteal L-Shaped Retractor

SKU RM-GGLR-1

\$39 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
18.1 cm (18 cm) — 20 mm	RM-GGLR-1-1	\$39
20.0 cm — 20 mm	RM-GGLR-1-2	\$44

PRODUCT DESCRIPTION

The Gonzalez Gluteal L-Shaped Retractor is an essential aesthetic plastic surgery instrument engineered specifically to provide rigid, right-angled tissue retraction and pocket exposure during gluteal augmentation and contouring procedures. Designed with an L-shaped architecture, this retractor allows surgeons to exert direct perpendicular counter-traction on dense muscle and fascial planes, creating an unyielding operative corridor for implant placement.

Built for variable surgical depths, this Gonzalez Gluteal L-Shaped Retractor model maintains a fixed 20 mm blade width while offering two functional length options: 18.1 cm (listed as 18 cm, \$39) for standard access and an extended 20 cm (\$44) profile for deep muscular dissection. The polished, right-angled blade hooks firmly beneath the gluteus maximus without causing tissue tears or edge necrosis. The ergonomic handle ensures surgical assistants maintain steady manual leverage throughout prolonged aesthetic dissections.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Gonzalez Gluteal L-Shaped Retractor to withstand repetitive hospital autoclave cycles, providing plastic and reconstructive surgery clinics worldwide with exceptional corrosion resistance, structural rigidity, and complete clinical reliability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
