AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
4-Prong Blunt End	RM-BFR-1-1	\$94
4-Prong Sharp End	RM-BFR-1-2	\$94

PRODUCT DESCRIPTION

The Blair Finger Retractor is a specialized handheld surgical instrument engineered specifically to provide precise, non-slip soft-tissue traction during plastic, reconstructive, and hand surgery. Designed with an ergonomic four-prong working end, this instrument allows surgeons to grasp and elevate delicate cutaneous and subcutaneous flaps without tearing or crushing tissue edges.

Built for steady manual control, this Blair Finger Retractor configuration features a uniform 14 cm rigid shaft (\$94) that provides optimal mechanical stability and access into narrow surgical pockets. Surgeons can select between a 4-prong sharp tip layout for secure purchase in dense connective tissues or a 4-prong blunt tip layout engineered to protect fragile neurovascular structures. Its 6.0 mm wide flat handle is crafted to promote a comfortable, fatigue-free grip during lengthy operative procedures.

Machined from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Blair Finger Retractor to withstand repetitive hospital sterilization cycles, providing plastic, orthopedic, and dermatologic surgical centers with high corrosion resistance and dependable durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
