SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Sailer Nasal Bridge Retractor	23.5 cm overall length, 15-20 mm x 50 mm curved blade	\$49
Protective Sleeve / Box	Individual transit packaging	\$49

PRODUCT DESCRIPTION

The Sailer Nasal Bridge Retractor is a specialized maxillofacial and rhinoplasty surgical retractor engineered specifically to provide safe, broad-surface tissue elevation along the bony and cartilaginous nasal dorsum. Designed with an anatomical curved blade, this instrument allows surgeons to mobilize the nasal skin-soft tissue envelope cleanly away from the nasal bridge without causing focal ischemic bruising or tearing fragile periosteum.

Built to withstand high-frequency autoclave sterilization while offering a lifetime warranty against rust, this dedicated Sailer Nasal Bridge Retractor configuration features an overall tool length of 23.5 cm (\$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the blade dimensions incorporate an expansive 15-20 mm wide x 50 mm long blade face. Its structural design features a handheld architecture optimized for balanced force distribution along the nasal bridge, providing operating assistants with steady manual leverage while keeping hands well outside the surgical field.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Sailer Nasal Bridge Retractor to withstand repetitive hospital sterilization cycles, providing plastic, reconstructive, and maxillofacial surgery centers worldwide with exceptional durability, corrosion resistance, and complete autoclave dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
