Senn T-Handle Retractor	4.5" (11.43 cm) length, multi-prong rake (Blunt or Sharp), T-handle	\$54
Protective Sleeve / Box	Individual transit packaging	\$54

PRODUCT DESCRIPTION

The Senn T-Handle Retractor is a specialized handheld surgical rake retractor engineered specifically to provide superior manual pulling leverage and non-slip soft-tissue displacement during plastic, hand, and minor orthopedic procedures. Designed with an ergonomic transverse T-handle, this instrument allows operating assistants to apply sustained counter-traction with a natural palm grip, preventing finger strain and hand fatigue throughout delicate dissections.

Built to withstand frequent autoclave sterilization cycles while remaining highly resistant to corrosion, this Senn T-Handle Retractor configuration features an overall instrument length of 4.5 inches (11.43 cm, \$54). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working tip geometry features inward-bent prongs built in a multi-pronged rake layout to ensure highly efficient tissue withdrawal without slipping off dense fibrous margins. Surgeons can select from two prong style options: Blunt prong tips designed for safe soft tissue manipulation minimizing trauma, or Sharp prong tips designed to secure a firm, slippage-free hold on tough tissue layers.

Forged with an anti-glare satin matte finish, Retractor Maker produces the Senn T-Handle Retractor to strict clinical tolerances, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for hand trauma suites, cosmetic surgery centers, and outpatient surgical clinics worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
