Finochietto Rib Spreader

SKU RM-FRS-SERIES-1

\$329 USD

COMPONENT LIST

QUANTITY	COMPONENT	DIMENSIONS / DESCRIPTION
1	Streamlined Parallel Guide Rail Track Frame	Linear bar chassis designed to slide open and widen bones
2 (Fixed Pair)	Fixed Angled Blades	Bone-gripping lateral blocks featuring circular fenestrations
1	Integrated Turning Screw Lock	Manual structural lock positioned to securely retain frame expansion
2	Ergonomic Forceps Extension Arms	Lightweight structured handles optimized to curb user fatigue
1	Protective Storage / Box	Standard transit packaging

PRODUCT DESCRIPTION

The Finochietto Rib Spreader is a foundational cardiothoracic surgical retractor engineered specifically to provide safe, gradual intercostal rib separation and chest wall exposure during major pulmonary, cardiac, and mediastinal operations. Designed with a robust rack-and-pinion guide rail, this instrument allows surgeons to apply calibrated mechanical distraction across adjacent ribs, preventing costal fractures while establishing an unencumbered visual corridor into the pleural cavity.

Built to accommodate diverse thoracic cavity depths and anatomical sizes, the standard Finochietto Rib Spreader framework can be selected across six core multi-size combinations depending on target surgical requirements: Option 1 (40 × 45 mm / 135 mm spread, \$329), Option 2 (40 × 45 mm / 150 mm spread, \$339), Option 3 (46 × 62 mm / 190 mm spread, \$349), Option 4 (52 × 62 mm / 175 mm spread, \$339), Option 5 (80 × 65 mm / 190 mm spread, \$349), and Option 6 (85 × 65 mm / 175 mm spread, \$359). Handcrafted from

Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the fixed angled lateral blades feature circular fenestrations that ensure positive osseous grip, while the integrated turning screw lock securely retains frame expansion without slippage.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Finochietto Rib Spreader to withstand repetitive hospital autoclave cycles, providing cardiothoracic suites, trauma centers, and lung transplant operating rooms worldwide with exceptional structural rigidity, corrosion resistance, and complete clinical dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
