Large Ring — 32.5 cm x 18.3 cm (Gynecology/Urology)	RM-LSR-GMU-1-3	\$414

PRODUCT DESCRIPTION

The Lone Star Retractor (Gynecology & Male Urology) is a specialized self-retaining surgical retractor engineered to establish unobstructed operative visibility during complex urogynecological and male urological interventions. By securing elastic stay hooks across its articulated outer ring, this platform delivers multi-directional, hands-free retraction that eliminates assistant fatigue while preserving delicate genital and perineal tissues.

Designed to adapt seamlessly to pelvic and groin anatomy, this Lone Star Retractor (Gynecology & Male Urology) frame features an articulated hinged architecture that flexes to lie flat against the patient's perineum or lower abdomen. The integrated perimeter notches lock elastic stays securely at micro-incremental positions, enabling surgeons to easily adjust tension vectors without tearing mucosal flaps or causing localized ischemia.

Crafted from medical-grade anodized aluminum and Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin finish, Retractor Maker supplies the Lone Star Retractor (Gynecology & Male Urology) non-sterile and fully autoclavable inside an individual protective box, providing surgical centers with an indispensable, long-lasting pelvic retraction platform.

THANK YOU

We look forward to discussing your surgical retractor requirements.
