10 cm (approx. 4.0"), 4x4 sharp or blunt prongs	RM-ASRR-1-2	\$99

PRODUCT DESCRIPTION

The ALM Self Retaining Retractor is an indispensable minor surgery retractor engineered to provide hands-free wound edge separation and stable tissue exposure during superficial surgical interventions. By anchoring opposing tissue margins with finely calibrated prongs, this instrument frees surgical assistants while maintaining a clear, static visual field in delicate operative sites.

Designed for micro-anatomical access, the ALM Self Retaining Retractor is manufactured in two compact lengths: 7 cm (\$89) and 10 cm (\$99). Surgeons can customize the instrument with either sharp 4x4 prongs for firm subcutaneous purchase or blunt 4x4 prongs to safeguard delicate neurovascular margins. The mechanical thumbscrew drive allows precise, micro-incremental arm spreading that stays locked under counter-traction without accidental slipping.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a non-reflective satin finish, Retractor Maker manufactures the ALM Self Retaining Retractor to withstand repeated hospital autoclaving cycles, providing plastic, orthopedic, and general surgery clinics with long-lasting clinical precision.

THANK YOU

We look forward to discussing your surgical retractor requirements.
