Anterior Femoral Condylar Retractor

SKU RM-AFCR-1

\$99 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Anterior Femoral Condylar Retractor	5" (12.7 cm) length, 45 mm fenestrated serrated blade	\$99
Protective Sleeve / Box	Individual transit packaging	\$99

PRODUCT DESCRIPTION

The Anterior Femoral Condylar Retractor is a precision orthopedic surgical retractor engineered specifically to provide optimal anterior exposure of the distal femur during primary and revision knee arthroplasty. By anchoring firmly against the anterior cortex, this instrument displaces quadriceps muscle tissue and the extensor mechanism without placing excessive stress on surrounding ligaments.

Designed for superior intraoperative ergonomics, this Anterior Femoral Condylar Retractor configuration features a 5-inch (12.7 cm) overall length and a 45 mm wide working end. The blade incorporates an angled, fenestrated geometry that reduces overall instrument weight to minimize assistant hand fatigue during lengthy joint reconstructions. Distinct cross-serrations across the blade tip provide enhanced tissue traction, preventing the retractor from slipping off the bony femoral condyle under counter-tension.

Manufactured from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin finish, Retractor Maker produces the Anterior Femoral Condylar Retractor to withstand high mechanical leverage and repetitive hospital steam autoclaving cycles, giving joint reconstruction teams reliable durability and performance.

THANK YOU

We look forward to discussing your surgical retractor requirements.
