Protective Sleeve / Box	Individual transit packaging	\$79

PRODUCT DESCRIPTION

The Cerkes Nasal Retractor With Weight - Gruber Columella Retractor is an innovative aesthetic surgery retractor engineered to establish stable, hands-free exposure of the columella and caudal septum during open rhinoplasty procedures. By combining a specialized anatomical hook blade with a calibrated counterweight, this instrument utilizes gravitational tension to hold tissues steady, eliminating assistant hand fatigue and operative field obstruction.

Designed for seamless clinical workflow, this Cerkes Nasal Retractor With Weight - Gruber Columella Retractor system features a precision-milled columellar hook that seats securely under the nasal base without pinching or compromising dermal vascularity. The suspended spherical weight applies gentle, continuous downward counter-traction, maintaining a wide, stationary view of the lower lateral cartilages and septal angle while freeing both hands of the operating surgeon for graft shaping and suturing.

Machined from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Cerkes Nasal Retractor With Weight - Gruber Columella Retractor to strict clinical standards, providing cosmetic clinics and ENT hospitals with an indispensable, fully autoclavable instrument ready for daily operative use.

THANK YOU

We look forward to discussing your surgical retractor requirements.
