Protective Sleeve / Box	Individual transit packaging	\$44

PRODUCT DESCRIPTION

The Cottle Nasal Retractor - 4 Blunt Prongs is a foundational rhinoplasty and septoplasty surgical retractor engineered specifically to provide broad, atraumatic soft-tissue exposure of the nasal vestibule and septum. Designed with smoothly polished blunt tips, this instrument allows surgeons to retract delicate mucosal membranes and cutaneous margins without causing localized puncture wounds or tearing.

Built for refined intranasal control, this Cottle Nasal Retractor - 4 Blunt Prongs configuration features an overall length of 6 inches (15.0 cm, \$44) and a 10.0 mm wide rake head profile. The 4-prong layout incorporates unique recessed outside prongs specifically engineered to deliver selective, customized retraction as needed while conforming to the anatomical curve of the alar rim. Its flat ergonomic handle ensures a steady, non-slip manual grip that minimizes hand fatigue during prolonged dissections.

Machined from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Cottle Nasal Retractor - 4 Blunt Prongs to strict clinical standards, ensuring high corrosion resistance, unyielding structural rigidity, and complete autoclave compatibility for plastic and ENT operating theaters worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
