Style #2 — 1/4" × 1/2" & 3/8" × 7/8"	RM-CRDE-RET-1-2	\$35

PRODUCT DESCRIPTION

The Crile Retractor Double-Ended is an essential handheld surgical instrument engineered specifically to provide reliable, multi-depth soft-tissue and wound margin exposure during minor general, plastic, and reconstructive procedures. Designed with two distinct, oppositely oriented right-angled blades on a single compact chassis, this retractor allows surgical teams to transition instantly between shallow subcutaneous tissue retraction and deeper fascial elevation.

Built for exceptional agility in restricted surgical spaces, this Crile Retractor Double-Ended model features an overall length of 4 ¼ inches (10.8 cm). The instrument is offered in two standardized style configurations: Style #1 (\$29), featuring 11 mm × 3 mm (1/8" × 7/16") and 20 mm × 6 mm (1/4" × 13/16") blades, and Style #2 (\$35), featuring 1/4" × 1/2" and 3/8" × 7/8" blades. The smooth, rounded blade margins prevent tissue trauma, while the central handle provides a fatigue-free grip for operating assistants.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Crile Retractor Double-Ended to withstand repetitive hospital autoclave cycles, delivering high corrosion resistance, excellent manual balance, and complete clinical durability for outpatient clinics and operating rooms worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
