Gifford-Jansen Retractor

SKU RM-GJR-115-1

\$84 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
3×3 Prongs Layout — Sharp or Blunt Tips	RM-GJR-115-1-1	\$84
4×4 Prongs Layout — Sharp or Blunt Tips	RM-GJR-115-1-2	\$89

PRODUCT DESCRIPTION

The Gifford-Jansen Retractor is a specialized self-retaining surgical retractor engineered specifically to provide precise, hands-free soft-tissue and periosteal retraction in confined surgical fields. Primarily utilized in otologic, mastoid, and minor neurosurgical approaches, this compact retractor holds wound margins open under mechanical tension, eliminating manual assistant fatigue during delicate bone drilling.

Built for optimal working clearance, this Gifford-Jansen Retractor model maintains a fixed total length footprint of 11.5 cm that provides high maneuverability without crowding the operative site. Surgeons can customize the instrument across two prong structural options: a 3×3 prongs layout (\$84) or an expansive 4×4 prongs layout (\$89). Both configurations are selectable with Sharp tips designed for secure, slip-free tissue engagement in dense fascia, or Blunt tips engineered to minimize structural trauma on delicate soft tissue layers.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Gifford-Jansen Retractor to strict clinical tolerances, delivering high corrosion resistance, smooth mechanical locking, and complete autoclave durability for ENT and neurosurgical suites worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
