AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Parker-Mott Retractors	15.3 cm overall length, asymmetrical double-ended solid blades	\$49
Protective Sleeve / Box	Standard transit packaging	\$49

PRODUCT DESCRIPTION

The Parker-Mott Retractor-Set of Two is an essential paired surgical instrument set engineered specifically to provide reliable, multi-depth wound margin and soft-tissue retraction during general, orthopedic, and plastic surgical procedures. Designed with contrasting curved blades on opposite ends of a central handle, these retractors allow surgical teams to transition effortlessly between shallow subcutaneous tissue retraction and deeper muscular elevation.

Built in a single standard size layout built for lasting mechanical strength and corrosion resistance, this Parker-Mott Retractor-Set of Two configuration features an overall tool length of 15.3 cm (\$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the blade geometry layout incorporates asymmetrical, double-ended solid blade profiles with smooth rounded borders that cradle tissue margins safely without causing localized bruising. Its flat-surfaced central grip framework provides operating assistants with steady, fatigue-free manual leverage throughout active operating procedures.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Parker-Mott Retractor-Set of Two to withstand repetitive hospital sterilization cycles, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for operating rooms, trauma centers, and outpatient surgical clinics worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
