| Set of Three Upgrade — Combined Small, Medium & Large | RM-RRDE-14-1-4 | \$94        |

### PRODUCT DESCRIPTION

The Roux Retractor - Double Ended is a versatile handheld surgical retractor engineered specifically to provide dependable, non-traumatic soft-tissue displacement and wound margin exposure during general, orthopedic, and plastic procedures. Designed with an anatomical C-curved dual-ended blade architecture, this instrument allows surgical teams to transition effortlessly between superficial skin flap elevation and deeper muscular retraction without exchanging instruments.

Built to withstand frequent autoclave sterilization cycles while offering a lifetime warranty against rust, the Roux Retractor - Double Ended series is offered across three overall lengths: 14 cm (\$54), 15 cm (\$59), and 17 cm (\$64). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the instrument features a jaw depth range of 20 mm to 36 mm and a jaw width range of 15 mm to 20 mm. Surgeons can order individual sizes—Small (19 × 25 mm), Medium (22 × 41 mm), or Large (25 × 41 mm)—or upgrade to the comprehensive Set of Three (\$94) combining all three models for maximum operating room flexibility.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Roux Retractor - Double Ended to maintain exceptional mechanical stability under sustained counter-traction, delivering reliable corrosion

resistance, structural rigidity, and complete autoclave durability for hospital operating theaters and trauma centers worldwide.

# THANK YOU

We look forward to discussing your surgical retractor requirements.
