Reich Condyle Retractor

SKU RM-RCR-1

\$49 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
18 cm Overall Length — 80° or 110° profile	RM-RCR-1-1	\$49
19 cm Overall Length — 80° or 110° profile	RM-RCR-1-2	\$59

PRODUCT DESCRIPTION

The Reich Condyle Retractor is a specialized oral, maxillofacial, and temporomandibular joint (TMJ) surgical retractor engineered specifically to provide safe bone leverage and soft-tissue displacement around the mandibular condyle and subcondylar neck. Designed with an anatomical hooking angle, this instrument allows surgeons to wrap around the deep condylar neck cleanly, shielding the internal maxillary artery, pterygoid plexus, and facial nerve branches during subcondylar osteotomies.

Built with a highly durable and corrosion-resistant chassis, this Reich Condyle Retractor series is available across two overall lengths: 18 cm (\$49) for standard TMJ approaches and 19 cm (\$59) for deeper operative fields. Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working end offers two distinct angulations selectable from the ordering parameters: an 80 Degree profile layout for submandibular approaches or a 110 Degree profile layout optimized for preauricular TMJ exposures. Its ergonomic handle delivers fatigue-free manual leverage for operating assistants.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Reich Condyle Retractor to withstand heavy mechanical loads and repeated hospital autoclave cycles, providing oral, maxillofacial, and craniofacial surgery centers worldwide with exceptional durability, corrosion resistance, and complete autoclave dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
