\$44 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
17 cm	RM-LUR-1-1	\$44
25 cm	RM-LUR-1-2	\$49

PRODUCT DESCRIPTION

The Lothrop Uvula Retractor is an indispensable otolaryngology surgical retractor engineered specifically to provide safe, non-traumatic elevation and forward displacement of the uvula and soft palate during posterior pharyngeal and adenoid procedures. Designed with an anatomically curved blade face, this instrument allows ENT surgeons to access the nasopharynx cleanly without causing mucosal tearing or post-operative uvular edema.

Built for complete anatomical adaptability, this Lothrop Uvula Retractor series is handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) and features customizable total lengths: a standard 17 cm model (\$44) for routine intraoral procedures and an extended 25 cm model (\$49) for deep transoral access. Surgeons can select between two matching blade dimension profiles: 17 mm × 20 mm for focused pediatric and adult anatomy, or 18 mm × 40 mm for broad palatal elevation. Its ergonomic handle ensures steady, fatigue-free manual leverage for operating assistants.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Lothrop Uvula Retractor to withstand repetitive hospital sterilization cycles, providing ENT suites, plastic surgery clinics, and hospital operating rooms worldwide with exceptional durability, corrosion resistance, and complete autoclave compatibility.

THANK YOU

We look forward to discussing your surgical retractor requirements.
