Hoyos Remora Retractor

SKU RM-HRR-1

\$499 USD

COMPONENT LIST

QUANTITY	COMPONENT	DIMENSIONS / DESCRIPTION
1	Hoyos Remora Retractor	Curved serrated blade, integrated fiber-optic bundle, suction tube
1	Universal Light Cable Adapter	Connects to standard OR fiber-optic light sources
1	Protective Sleeve / Box	Standard transit packaging

PRODUCT DESCRIPTION

The Hoyos Remora Retractor is an advanced multi-functional surgical retractor engineered specifically to provide superior pocket visualization, simultaneous fluid evacuation, and illuminated flap elevation during high-definition abdominoplasty. Designed to fit modularly within the primary Hoyos body sculpting assembly, this instrument allows surgeons to navigate deep subgaleal and abdominal tissue planes without requiring secondary light wands or separate suction cannulas.

Built for optimal operative efficiency and cavity clearance, this Hoyos Remora Retractor configuration (\$499) features a specialized curved blade layout equipped with proprietary stabilization serrations that anchor securely against tissue planes, preventing accidental slippage during vigorous contouring. The instrument houses built-in fiber-optic light channels coupled with a specialized suction evacuation tube system, delivering shadow-free illumination while instantly removing electrosurgical plume, blood, and irrigation fluids.

Crafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) and high-transmission optical glass fibers with an anti-glare satin matte finish, Retractor Maker manufactures the Hoyos Remora Retractor to strict clinical standards, providing plastic and cosmetic surgeons worldwide with exceptional optical clarity, unyielding durability, and complete autoclave compatibility.

THANK YOU

We look forward to discussing your surgical retractor requirements.
