Little Retractor

SKU RM-LTR-195-1

\$54 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
10 mm × 12 mm	RM-LTR-195-1-1	\$54
16 mm × 12 mm	RM-LTR-195-1-2	\$59

PRODUCT DESCRIPTION

The Little Retractor is an adaptable handheld surgical instrument engineered specifically to provide safe, non-traumatic soft-tissue displacement and wound margin retraction across minor general, plastic, and reconstructive procedures. Designed with an anatomical curved blade profile, this retractor allows surgical assistants to maintain steady counter-traction on cutaneous margins and delicate fascial layers without causing localized pressure necrosis or edge lacerations.

Built for refined procedural agility, this Little Retractor retains a uniform total length frame of 19.5 cm that provides comfortable reaching clearance while keeping assistant hands outside the primary operative field. Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the instrument is customizable via two distinct working end choices: a 10 mm × 12 mm blade layout (\$54) for narrow operative spaces and an expanded 16 mm × 12 mm blade layout (\$59) for broader subcutaneous tissue holding. Its balanced flat handle ensures steady, fatigue-free manual grip control.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Little Retractor to withstand repetitive hospital autoclave cycles, providing outpatient surgical centers, plastic surgery suites, and general operating theaters worldwide with exceptional corrosion resistance, structural rigidity, and complete clinical durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
