SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Small — 17 cm	RM-PRR-17-1-1	\$44
Standard — 18.5 cm, 45×7 mm blade	RM-PRR-17-1-2	\$49

PRODUCT DESCRIPTION

The Piriform Rim Retractor is an essential maxillofacial and rhinoplasty surgical retractor engineered specifically to provide safe, non-traumatic soft-tissue displacement and osseous exposure around the nasal aperture. Designed with an anatomically contoured hooking beak, this instrument allows surgeons to wrap securely over the lateral piriform margin, elevating the upper lip, paranasal musculature, and periosteum cleanly away from reciprocating bone saws during midface osteotomies.

Built for optimal intraoral clearance, this Piriform Rim Retractor configuration features an overall tool length of 17 cm (\$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) to ensure lasting strength and corrosion resistance, its smoothly polished blade margins seat firmly against the cortical bone without lacerating the fragile nasal mucosa or compressing paranasal neurovascular bundles. The ergonomic flat handle provides operating assistants with steady manual counter-traction throughout extensive maxillofacial reconstructions.

Forged with an anti-glare satin matte finish, Retractor Maker produces the Piriform Rim Retractor to withstand repetitive hospital sterilization cycles, providing oral, maxillofacial, and facial reconstructive surgical suites worldwide with exceptional mechanical stability, corrosion resistance, and complete autoclave durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
