Browne Deltoid Retractors

SKU RM-BDR-1

\$109 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
10 ³ / ₄ " (27.3 cm)	RM-BDR-1-1	\$109
11 ¹ / ₂ " (29.2 cm)	RM-BDR-1-2	\$114
12 ¹ / ₄ " (31.1 cm)	RM-BDR-1-3	\$119

PRODUCT DESCRIPTION

Browne Deltoid Retractors are specialized orthopedic shoulder instruments engineered specifically to provide broad, non-slip retraction of the deltoid muscle during open shoulder reconstructive procedures. Designed with an expansive, anatomically curved blade that conforms smoothly beneath muscular flaps, these retractors distribute counter-traction evenly to protect deltoid muscle fibers and the axillary nerve from focal compression.

Built for heavy joint leverage, the Browne Deltoid Retractors series is available across three selectable overall lengths: 10 ³/₄" (\$109), 11 ¹/₂" (\$114), and 12 ¹/₄" (\$119). Surgeons can configure the working end across four standardized blade diameters: 40 mm, 45 mm, 50 mm, and 57 mm, ensuring precise tissue clearance for both slender and muscular patients. Its ergonomic handle provides the surgical assistant with superior mechanical leverage, keeping hands well clear of reaming and plating instrumentation.

Machined from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures Browne Deltoid Retractors to withstand heavy orthopaedic torque and repetitive hospital autoclaving cycles, providing shoulder reconstruction and sports medicine teams with unyielding clinical durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
