SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Senn Forward Retractor	6.25" (15.87 cm) length, shallow-toothed forward tip, flat handle	\$49
Protective Sleeve / Box	Individual transit packaging	\$49

PRODUCT DESCRIPTION

The Senn Forward Retractor is an innovative handheld surgical instrument engineered specifically to provide secure, non-slip superficial wound margin retraction and soft-tissue displacement during plastic, hand, and general surgical interventions. Designed with an anatomically angled forward-projecting blade, this retractor allows surgical teams to grasp fibrous tissue planes cleanly, keeping assistant hands outside the surgeon's operative sightline.

Built with an inert surface to protect against environmental degradation, this Senn Forward Retractor configuration features an overall instrument length of 6.25 inches (15.87 cm, \$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working tip geometry features a specialized forward tip armed with shallow teeth for highly efficient, slippage-free tissue control on dense dermal borders and fascia without causing crushing injury. The single-ended design is integrated into an ergonomically smoothed handle chassis that provides operating assistants with fatigue-free manual leverage.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Senn Forward Retractor to withstand repetitive hospital sterilization cycles, providing outpatient surgical centers, plastic surgery clinics, and trauma theaters worldwide with exceptional corrosion resistance, structural rigidity, and complete autoclave durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
