PRODUCT DESCRIPTION

The Arnett Le Fort Upper Lip Retractor is a specialized maxillofacial surgical retractor engineered to provide atraumatic elevation of the upper lip and superior vestibular tissues during orthognathic and facial reconstructive surgery. Designed to conform smoothly to the anterior facial skeleton, this instrument protects delicate perioral soft tissues while establishing a clear operative corridor to the maxilla.

Built specifically for cranio-maxillofacial procedures, this Arnett Le Fort Upper Lip Retractor configuration features a broad, anatomically curved blade that cradles the upper lip safely away from oscillating saws, rotary burrs, and fixation screws. Its angled shank and ergonomic handle provide the surgical assistant with steady leverage and fatigue-free manual control, keeping hands outside the visual line of sight during osteotomy cuts.

Manufactured from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a glare-absorbing satin matte finish, Retractor Maker produces the Arnett Le Fort Upper Lip Retractor to withstand repetitive hospital sterilization cycles, providing oral, maxillofacial, and plastic surgery suites with an indispensable instrument for midface osteotomies.

THANK YOU

We look forward to discussing your surgical retractor requirements.
