Protective Sleeve / Box	Dimensions / Details: Individual transit packaging · Quantity Included: 1	\$79

PRODUCT DESCRIPTION

The Lukens Tracheal Retractor is a specialized double-ended airway surgical retractor engineered specifically to provide safe, non-traumatic soft-tissue displacement and tracheal cartilage stabilization during tracheostomy and cervical procedures. Designed with contrasting asymmetric blades on opposite ends of a central handle, this instrument allows surgical teams to transition effortlessly between broad pretracheal muscle holding and precise cartilage elevation without exchanging instruments.

Built to clinical framework standards, this Lukens Tracheal Retractor configuration features an overall tool length of 6 ¾ inches (17.1 cm, \$79). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the instrument incorporates a double-ended blade profile featuring a 10 mm wide Curved Blade End for broad soft-tissue displacement and a 7 mm wide Angular Blade End for targeted tracheal ring elevation. The central ergonomic handle provides operating assistants with steady manual counter-traction and reduced hand fatigue throughout the intervention.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Lukens Tracheal Retractor to withstand repetitive hospital sterilization cycles, providing ENT surgical suites, trauma centers, and emergency departments worldwide with exceptional durability, corrosion resistance, and complete autoclave durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
