Smithwick Nerve Retractor

SKU RM-SNR-29-1

\$29 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Small — 17 cm, curved blunt hook	RM-SNR-29-1-1	\$29
Medium — 21 cm, curved blunt hook	RM-SNR-29-1-2	\$29
Standard — 29 cm, curved blunt hook	RM-SNR-29-1-3	\$29

PRODUCT DESCRIPTION

The Smithwick Nerve Retractor is a specialized neurosurgical and spinal surgical retractor engineered specifically to provide safe, delicate nerve root manipulation and sympathetic trunk mobilization in deep anatomical corridors. Designed with an elongated slender body shaft, this retractor allows spine and vascular surgeons to explore, mobilize, and shield delicate neural fibers and vascular bundles cleanly without risking puncture, laceration, or shear trauma.

Built to deliver maximum durability and corrosion resistance backed by an absolute lifetime warranty against rust and material defects, this Smithwick Nerve Retractor configuration features an extended overall tool length of 29 cm (\$29) that provides extraordinary reach into the deep retroperitoneum and thoracic cavity. Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working end design features an asymmetrical double-ended layout incorporating an atraumatic blunt curved hook on one end specifically contoured to cradle nerve trunks safely. Its balanced central handle provides fingertip rotational control and refined tactile feedback.

Supplied as a non-sterile, re-sterilizable operating room device with an anti-glare satin matte finish, Retractor Maker manufactures the Smithwick Nerve Retractor to withstand frequent high-temperature autoclave processing, delivering unyielding structural rigidity, corrosion resistance, and complete autoclave durability for neurosurgical, spine, and vascular surgical suites worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
