Murphy Retractor

SKU RM-MR-195-1

\$44 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
2 Prongs (8.0 mm wide)	RM-MR-195-1-1	\$44
3 Prongs (13.0 mm wide)	RM-MR-195-1-2	\$49
4 Prongs (18.0 mm wide)	RM-MR-195-1-3	\$54
6 Prongs (28.0 mm wide)	RM-MR-195-1-4	\$59

PRODUCT DESCRIPTION

The Murphy Retractor is a foundational surgical rake retractor engineered specifically to provide dependable, non-slip soft-tissue and wound margin retraction across general, plastic, and orthopedic procedures. Designed with multiple curved prongs, this instrument allows surgical assistants to apply uniform manual counter-traction across cutaneous and subcutaneous planes without causing focal tissue tearing or slippage.

Built for complete procedural adaptability, this Murphy Retractor maintains a uniform total length frame of 19.5 cm that provides comfortable reaching clearance. Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the instrument offers selectable combined prong configurations and blade widths: 2 Prongs with an 8.0 mm wide working end (\$44), 3 Prongs with a 13.0 mm wide working end (\$49), 4 Prongs with an 18.0 mm wide working end (\$54), and 6 Prongs with an expansive 28.0 mm wide working end (\$59). Surgeons can choose between Blunt tips for gentle tissue manipulation minimizing compression trauma or Sharp tips for highly reliable, slippage-free tissue engagement. Its ergonomic teardrop ring handle ensures fatigue-free pulling leverage.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Murphy Retractor to withstand repetitive hospital autoclave cycles, delivering high corrosion resistance, structural rigidity, and complete

clinical durability for operating theaters worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
