180 x 25 mm (L x W)	RM-EBR-1-8	\$274
190 x 36 mm (L x W)	RM-EBR-1-9	\$284
220 x 27 mm (L x W)	RM-EBR-1-10	\$294

PRODUCT DESCRIPTION

The Epstein Breast Retractor is an internationally acclaimed aesthetic and reconstructive breast surgery instrument engineered specifically to provide expansive tissue elevation and pocket visualization during mammoplasty. Designed with an elongated curved blade that tapers to a smooth distal tip, this retractor allows surgeons to dissect and elevate the pectoralis major muscle and breast parenchyma cleanly, establishing an unhindered surgical corridor for prosthesis insertion.

Built to accommodate diverse breast pocket depths and surgical approaches, this Epstein Breast Retractor series features a single baseline handle layout paired with a broad assortment of ten selectable blade lengths and widths: 90 × 27 mm (\$244), 110 × 27 mm (\$249), 140 × 27 mm (\$254), 150 × 25 mm (\$259), 150 × 30 mm (\$264), 150 × 36 mm (\$269), 160 × 27 mm (\$274), 180 × 25 mm (\$279), 190 × 36 mm (\$284), and an extended 220 × 27 mm (\$289) reach. Its ergonomic handle delivers fatigue-free manual leverage and optimal balance for operating assistants.

Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Epstein Breast Retractor to withstand repetitive hospital autoclave cycles, providing plastic, aesthetic, and oncologic breast surgery centers worldwide with exceptional durability, corrosion resistance, and complete clinical dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
