Protective Sleeve / Box	Dimensions / Details: Individual transit packaging · Quantity Included: 1	\$54

PRODUCT DESCRIPTION

The Koerte Retractor is a heavy-duty surgical rake retractor engineered specifically to provide powerful, non-slip soft-tissue and muscular retraction during major abdominal, thoracic, and orthopedic procedures. Designed with an expansive multi-prong rake head, this instrument allows surgical assistants to apply continuous, uniform counter-traction across broad fascial planes and thick muscle layers without slipping.

Built to maximize retraction capability in deep operative fields, this dedicated Koerte Retractor configuration features an overall tool length of 24 cm (\$54). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), its working end incorporates 8 Sharp Rake-Style Prongs specifically curved to bite securely into dense fibrous tissues and thick musculature. The handle assembly features an ergonomic finger ring handle equipped with an integrated anti-slip central ring that gives operating assistants superior pulling leverage and hand stabilization.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Koerte Retractor to withstand heavy mechanical loads and repeated hospital autoclave cycles, providing general, thoracic, and orthopedic trauma centers worldwide with exceptional durability, corrosion resistance, and complete clinical dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
