AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Seeburger Retractors	14 cm overall length, flat handle, curved blades	\$54
Protective Sleeve / Box	Standard transit packaging	\$54

PRODUCT DESCRIPTION

The Seeburger Retractor-Set of Two is an essential paired surgical instrument set engineered specifically to provide reliable, non-traumatic soft-tissue displacement and superficial wound margin exposure during general, plastic, and reconstructive procedures. Designed with balanced dual working profiles, this set allows surgical assistants to maintain steady manual counter-traction across opposing incision borders without crushing delicate dermal or subdermal planes.

Built to withstand high-frequency autoclave sterilization while providing a lifetime warranty against rust and defects, this Seeburger Retractor-Set of Two configuration features an overall tool length of 14 cm (\$54). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the instrument chassis integrates a slender central flat handle assembly that provides exceptional tactile sensitivity and ergonomic balance during delicate micro-dissections. Classified as a certified premium operating room grade handheld retractor set, both units feature smoothly contoured blade margins to eliminate focal tissue trauma.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Seeburger Retractor-Set of Two to uphold the highest clinical standards under intense surgical lighting, providing outpatient surgery suites, trauma theaters, and hospital operating rooms worldwide with unmatched durability, corrosion resistance, and complete autoclave dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
