\$79 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Small — 45 mm blade	RM-BTR-1-1	\$79
Large — 63 mm blade	RM-BTR-1-2	\$89

PRODUCT DESCRIPTION

The Bennett Tibia Retractor is a specialized orthopedic surgical retractor engineered specifically to provide reliable leverage and soft-tissue exposure around the tibial shaft and plateau during knee and lower leg surgery. Designed with a wide, curved distal blade that conforms around long bone cortices, this instrument allows surgical assistants to retract bulky anterior and posterior muscle compartments with minimal physical strain.

Built for heavy lower-extremity counter-traction, this Bennett Tibia Retractor series is offered in two primary configurations: a Small model with a 45 mm blade width (\$79) and a Large model with an expansive 63 mm blade width (\$89). Both profiles feature selectable overall lengths spanning 9 ½ inches to 9 ¾ inches (with standard production runs accommodating 9 ¼ inches). Its smooth, rounded blade lip wraps safely around the bone, shielding periosteum and neurovascular bundles during osteotomies and fracture fixation.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Bennett Tibia Retractor to withstand intense mechanical torque and repeated autoclave cycles, delivering exceptional strength and reliability to orthopedic trauma suites worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
