SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Ferreira Face Lift Retractor	4 ¼" (108 mm) overall length, 22 mm wide curved blade	\$49
Protective Sleeve / Box	Individual transit packaging	\$49

PRODUCT DESCRIPTION

The Ferreira Face Lift Retractor is a specialized handheld aesthetic surgery instrument engineered specifically to provide atraumatic soft-tissue retraction and cutaneous flap elevation during facial rejuvenation procedures. Designed with an ergonomic shank and a gently curved distal blade, this retractor allows surgeons to undermine and elevate skin and SMAS flaps cleanly while protecting facial nerve branches and vascular networks from crushing.

Built for targeted facial flap deflection, this dedicated Ferreira Face Lift Retractor configuration features an overall tool length of 4 ¼ inches (108 mm, \$49). Its working end incorporates a 22 mm wide blade profile contoured with smooth, rounded margins that distribute manual counter-traction evenly across cutaneous tissues, preventing localized ischemia, dimpling, or edge tearing. Its lightweight ergonomic flat handle provides surgical assistants with steady, non-slip manual control during lengthy facial dissections.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the Ferreira Face Lift Retractor to strict clinical standards, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for cosmetic and facial plastic surgery centers worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
