SKU RM-BER-1

\$174 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
Solid Blade with 2 Blunt Teeth	RM-BER-1-1	\$174
Solid Blade with 2 Sharp Teeth	RM-BER-1-2	\$174

PRODUCT DESCRIPTION

The Bellucci Endaural Retractors are precision otologic surgical instruments engineered specifically to provide clear, hands-free exposure of the external auditory canal and middle ear structures during endaural approaches. Designed with an extremely curved distal architecture, these retractors hold soft tissue aside without obstructing delicate micro-instruments or the surgical microscope beam.

Built for delicate microsurgical procedures, this Bellucci Endaural Retractors model features an elongated 4 ¼-inch (10.8 cm) chassis engineered for precise manual control. The instrument is available in two specialized blade configurations: a solid blade with 2 blunt teeth for gentle tissue mobilization, or a solid blade with 2 sharp teeth for secure periosteal anchorage. All blade margins are crafted with smooth, rounded edges to reliably prevent localized tissue trauma.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures Bellucci Endaural Retractors to strict clinical tolerances, ensuring smooth mechanical locking, high corrosion resistance, and complete autoclave compatibility for otolaryngology suites worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
