Koenig Retractor

SKU RM-KNR-17-1

\$49 USD

COMPONENT LIST

QUANTITY	COMPONENT	DIMENSIONS / DESCRIPTION
1	With Fenestrated Blade	Available Dimensions: 13×13 mm or 13×16 mm · Primary Clinical Role: Direct through-blade visualization of underlying vessels/structures · Price (USD): \$49.00
1	Without Fenestrated Blade	Available Dimensions: 13×13 mm or 13×16 mm · Primary Clinical Role: Solid barrier soft-tissue holding and wound margin retraction · Price (USD): \$49.00
1	Protective Sleeve / Box	Available Dimensions: Standard Transit Packaging · Primary Clinical Role: — · Price (USD): Included

PRODUCT DESCRIPTION

The Koenig Retractor is a specialized handheld surgical instrument engineered specifically to provide safe, non-traumatic soft-tissue and wound margin retraction across general, orthopedic, and plastic surgical procedures. Designed with an ergonomic right-angled blade, this instrument allows surgical assistants to maintain steady counter-traction on cutaneous and subcutaneous planes without obscuring the operative field.

Built for optimal operational control, this reusable Koenig Retractor maintains a fixed overall instrument length of 17 cm (\$49). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the retractor can be customized across two distinct blade geometry layout profiles: With Fenestrated Blade featuring open windowing to optimize structural visibility, or Without Fenestrated Blade featuring a solid-surface blade profile for complete tissue barrier shielding. The instrument is offered in two standardized blade dimensions: 13.0 mm × 13.0 mm and 13.0 mm × 16.0 mm.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the Koenig Retractor to withstand repetitive hospital autoclave cycles, providing operating theaters worldwide with exceptional corrosion resistance, unyielding structural rigidity, and complete clinical durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
