Protective Sleeve / Box	Individual transit packaging — 1	\$89

PRODUCT DESCRIPTION

The Gruber Rhinoplasty Retractor is a specialized handheld rhinoplasty and facial plastic surgery instrument engineered specifically to provide safe, non-slip skin deflection over delicate nasal tissues. Designed to mobilize the nasal skin envelope and lower lateral cartilages, this retractor allows surgeons to maintain clean operative visualization across the caudal septum and nasal tip framework.

Built to optimize skin deflection over delicate nasal tissues, this Gruber Rhinoplasty Retractor configuration features a dedicated 10 mm wide double hooks layout (\$89). The tip configuration incorporates ergonomically designed double hooks optimized for grasping nasal skin flaps effortlessly without causing localized dermal puncturing or vascular compromise. Its slender balanced handle provides the operating surgeon with refined tactile sensitivity and fatigue-free manual leverage throughout intricate nasal remodeling.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Gruber Rhinoplasty Retractor to strict clinical standards, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for cosmetic, ENT, and facial plastic surgery clinics worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
