13" (approx. 33.0 cm) — 25, 38, 50, or 75 mm — Deep retroperitoneal, bariatric, and orthopedic hip access	RM-DRTH-1-2	\$64

PRODUCT DESCRIPTION

The Deaver Retractor Thin Handle is an ergonomic surgical instrument engineered specifically to combine deep anatomical retraction capabilities with a lightweight, slender handle profile. Designed to reduce user fatigue during multi-hour surgical procedures, this retractor allows operating assistants to maintain stable tissue counter-traction without the cumbersome heft of traditional bulky retractor stems.

Built for versatile abdominal and orthopedic exposure, the Deaver Retractor Thin Handle is offered in two selectable overall lengths: 12 inches (\$59) and 13 inches (\$64). The line is manufactured across four standard blade widths: 25 mm (approx. 1"), 38 mm (approx. 1 ½"), 50 mm (approx. 2"), and 75 mm (approx. 3"), with extended production specifications accommodating up to a 4-inch wide blade design for highly substantial deep tissue retraction. The smooth, deeply curved blade wraps safely around visceral and muscular masses.

Manufactured from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Deaver Retractor Thin Handle to strict clinical standards, delivering high tensile strength, exceptional corrosion resistance, and complete autoclave durability for hospital operating theaters worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
