24 cm	RM-BWSRR-1-4	\$164
30.5 cm	RM-BWSRR-1-5	\$169
31 cm	RM-BWSRR-1-6	\$174

PRODUCT DESCRIPTION

The Beckman-Weitlaner Self-Retaining Retractor is an essential deep-tissue surgical retractor engineered to establish stable, hands-free operative access during spinal, orthopedic, and neurological interventions. Built with specialized hinged blades that articulate independently, this instrument conforms seamlessly to irregular wound contours, eliminating assistant fatigue and maintaining steady exposure in asymmetrical incisions.

Designed for procedural adaptability, the Beckman-Weitlaner Self-Retaining Retractor is manufactured across six standard overall lengths: 14 cm (\$149), 16.5 cm (\$154), 21.5 cm (\$159), 24 cm (\$164), 30.5 cm (\$169), and 31 cm (\$174). Surgeons can customize the chassis with either 3×4 or 4×4 prong arrays in sharp tips for firm fascial purchase or blunt tips to safely protect deep vascular and visceral structures. Its integrated finger-ring ratchet catch maintains targeted tension under heavy tissue resistance.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker produces the Beckman-Weitlaner Self-Retaining Retractor to withstand repetitive

hospital sterilization cycles, giving surgical teams dependable holding stability, smooth articulation, and long-term durability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
