13 cm Variant — Single-ended smooth blade	RM-SSTR-1-1	\$44
14 cm Variant — Single-ended smooth blade	RM-SSTR-1-2	\$49

PRODUCT DESCRIPTION

The Salzburg Soft Tissue Retractor is a specialized oral, maxillofacial, and facial plastic surgical retractor engineered specifically to provide safe, non-traumatic soft-tissue displacement in confined surgical spaces. Designed with an ultra-smooth, curved working blade, this instrument allows surgeons to mobilize cheeks, lips, and mucoperiosteal flaps cleanly away from high-speed burs and osteotomes without causing localized pressure contusions or tears.

Built to withstand frequent autoclave sterilization cycles while providing a lifetime warranty against rust and defects, this Salzburg Soft Tissue Retractor is available in two distinct longitudinal reaches selectable via the configuration menus: a 13 cm variant (\$44) for compact anterior access and a 14 cm variant (\$49) for deeper oral cavity procedures. Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the blade profile layout features a single-ended, smooth retractor blade configured specifically to protect delicate maxillofacial tissues during deep cavity displacement. Its ergonomic flat handle provides operating assistants with fatigue-free manual leverage.

Forged with an anti-glare satin matte finish, Retractor Maker produces the Salzburg Soft Tissue Retractor to strict clinical standards, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for oral surgery suites, dental implantology centers, and maxillofacial clinics worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
