11.5 cm (approx. 4.5") — 15×11 mm / 14×10 mm dual ends	RM-SSDER-1-2	\$34

PRODUCT DESCRIPTION

The S Shape Double Ended Retractor is an indispensable handheld surgical retractor engineered specifically to provide gentle, non-traumatic soft-tissue displacement and wound margin exposure during plastic, general, and ENT procedures. Designed with an anatomical double-curved S-shaped chassis, this instrument allows operating assistants to apply steady counter-traction while keeping manual handling clear of the surgeon's direct line of sight.

Built to withstand frequent autoclave sterilization cycles while providing a lifetime warranty against rust and defects, this S Shape Double Ended Retractor series is available in two overall lengths: 10 cm (\$29) and 11.5 cm (\$34). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working blade size combinations feature asymmetric double-ended blades measuring 15 mm × 11 mm on one end and 14 mm × 10 mm on the opposing end. The smooth, S-shaped double-ended curves optimize visual clarity while minimizing local tissue damage and preventing localized ischemic pressure points.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures the S Shape Double Ended Retractor to strict clinical tolerances, delivering high corrosion resistance, unyielding structural rigidity, and complete autoclave durability for hospital operating rooms, outpatient surgical centers, and cosmetic clinics worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
