Lateral Wall Vaginal Retractor

SKU RM-LWVR-1

\$109 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
23 cm	RM-LWVR-1-1	\$109
26 cm	RM-LWVR-1-2	\$114
28 cm	RM-LWVR-1-3	\$119

PRODUCT DESCRIPTION

The Lateral Wall Vaginal Retractor is an essential gynecological and urogynecological surgical instrument engineered specifically to prevent redundant lateral vaginal tissue from prolapsing into the operative field. Used inside standard vaginal speculums or as an independent retractor, this instrument expands the lateral vaginal fornices cleanly, establishing an unhindered visual corridor to the cervix and vault during complex pelvic reconstructions.

Built for complete procedural adaptability, this Lateral Wall Vaginal Retractor series is handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) across three selectable overall lengths: 23 cm (\$109), 26 cm (\$114), and 28 cm (\$119). Integrated blade limits accommodate lengths from 63.5 mm to 114 mm to match varying vaginal depths. The retractor is available in two material finish profiles: Stainless Steel with a standard polished hygienic surface, or Insulated featuring a non-conductive dielectric coating for electrosurgical safety. Surgeons can also configure between Closed Shanks and Open Shanks variations for optimal central instrument clearance.

Forged to strict clinical standards, Retractor Maker produces the Lateral Wall Vaginal Retractor to withstand repetitive hospital autoclave cycles, providing gynecological, obstetrical, and pelvic surgery centers worldwide with exceptional durability, corrosion resistance, and complete clinical dependability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
