Stackable Hohmann Retractors

SKU RM-SHR-1

\$89 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
8 ¼" (20.96 cm) — Standard, Wide, or Bent Blade	RM-SHR-1-1	\$89
9 ¼" (23.50 cm) — Standard, Wide, or Bent Blade	RM-SHR-1-2	\$99

PRODUCT DESCRIPTION

Stackable Hohmann Retractors are innovative orthopedic bone leverage instruments engineered specifically to provide exceptional mechanical advantage and multi-vector soft-tissue displacement during joint arthroplasty and fracture repair. Designed with interlocking nesting handles, these retractors allow surgical assistants to stack multiple instruments together securely, multiplying retraction power in a single hand without crowding the operative corridor.

Built to withstand frequent autoclave sterilization cycles while remaining highly resistant to corrosion, this Stackable Hohmann Retractors series is offered in two overall lengths: 8 ¼ inches (20.96 cm, \$89) and 9 ¼ inches (23.50 cm, \$99). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working tip profile features an angled and curved bone-hugging tip layout that seats securely over cortical margins. Surgeons can choose from three distinct geometric blade profiles: a Standard Blade layout for general long bone exposure, a Wide Blade layout for broad muscular displacement, and a Bent Blade layout for deep joint clearance.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures Stackable Hohmann Retractors to endure heavy orthopaedic torque and repeated hospital autoclave cycles, providing trauma centers and joint reconstruction teams worldwide with unyielding clinical durability and surgical precision.

THANK YOU

We look forward to discussing your surgical retractor requirements.
