SIZE / OPTION	SKU / DETAILS	PRICE (USD)
House Hand Retractor	6" (15.24 cm) length, 5×16 mm & 9×25 mm double-ended blades	\$69
Protective Sleeve / Box	Individual transit packaging	\$69

PRODUCT DESCRIPTION

The House Hand Retractor is an internationally acclaimed double-ended surgical instrument engineered specifically to fulfill dual-retraction roles during otologic, facial plastic, and delicate reconstructive procedures. Designed with differing blade geometries on opposing working ends, this retractor allows surgical teams to transition instantly between superficial soft-tissue retraction and deeper wound exposure without switching tools.

Built for optimal procedural control in confined fields, this House Hand Retractor configuration features an overall instrument length of 6 inches (15.24 cm, \$69). Its integrated blade measurements combine a focused 5.0 mm × 16.0 mm blade profile on one end for narrow incisions and delicate meatal corridors with a larger 9.0 mm × 25.0 mm blade profile on the opposite end for broader fascial and muscular displacement. The smooth, rounded blade edges prevent tissue tearing, while the balanced central handle provides a fatigue-free grip for operating assistants.

Forged from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic) with a reflection-free satin matte finish, Retractor Maker manufactures the House Hand Retractor to withstand repetitive hospital autoclave cycles, delivering high corrosion resistance, unyielding structural rigidity, and complete clinical durability for otolaryngology and plastic surgery centers worldwide.

THANK YOU

We look forward to discussing your surgical retractor requirements.
