Lateral Soft Tissue Retractors

SKU RM-LSTR-ORTHO-1

\$84 USD

AVAILABLE SIZES & PRICING

SIZE / OPTION	SKU / DETAILS	PRICE (USD)
9.75 in — 20 mm blade	RM-LSTR-ORTHO-1-1	\$84
9.87 in — 22 mm blade	RM-LSTR-ORTHO-1-2	\$89

PRODUCT DESCRIPTION

Lateral Soft Tissue Retractors are indispensable orthopedic surgical instruments engineered specifically to provide secure, non-slip displacement of periarticular soft tissues, capsules, and lateral collateral ligaments during total knee arthroplasty. Designed with an anatomically curved shank, these retractors allow surgical teams to shield neurovascular structures and lateral ligamentous bands away from oscillating bone saws during tibial and femoral resection.

Built to accommodate varied patient anatomies and depth requirements, this Lateral Soft Tissue Retractors line is offered in two overall lengths: 9.75 inches (24.76 cm, \$84) and 9.87 inches (25.07 cm, \$89). Handcrafted from Premium Grade AISI 304/316 Stainless Steel (Non-Magnetic), the working ends feature selectable curved blade widths of 20 mm and 22 mm. The prong profile configurations include both Blunt and Sharp prong combinations tailored for precise tissue engagement without slippage off bone cortices. The heavy-duty handle provides operating assistants with steady manual counter-traction.

Forged with an anti-glare satin matte finish, Retractor Maker manufactures Lateral Soft Tissue Retractors to withstand heavy mechanical loads and repeated hospital autoclave cycles, providing knee reconstruction and orthopedic trauma centers worldwide with unyielding clinical durability, corrosion resistance, and surgical reliability.

THANK YOU

We look forward to discussing your surgical retractor requirements.
